

Easy Table

Unique design for the new office

A piece of furniture designed in collaboration with SA-Möbler.

When we decorate new offices and workplaces we have often lacked a sleek and simple desk that both can stand on its own or be part of a larger context. In addition - the flat screen entry has decreased the need for desk space, while the need of your own space has increased. We wanted a solution to this so we simply drew our own desk.

Easy Tables "rolled-up" table top is a smart and flexible solution to the problem. The "roll-up" serves as a visual barrier against neighbors, as a shelf and as a noise stop. Flip the table top down, the table can be used in the reception area or conference room.
