Chairman of the board

Love Sahlin  
IT Manager

## Our vision

pS Arkitektur works with projects ranging from commercial interiors to private houses and urban planning. Our vision is to create unique buildings, interiors and environments that make an emotional and visual impression. Our motto is "architecture that makes a difference". We challenge the obvious solutions and aesthetics in favor of creating something unique, derived from the company's identity and our client's dreams. Our office interiors and refurbishments enhance the clients brand identity and business opportunities. Architecture and design is a means of market positioning, creating far reaching values for our clients. We define the goals and demands so that the design will be an efficient tool and identity bearer. We bring forward the possibilities, visualize the invisible and suggest changes. We believe that inspiring environments generate positive energy!

Our vision is to create unique buildings, interiors and environments that make an emotional and visual impression. We aim high, both aesthetically and technically. It provides long-term durability, which is good for both economy and our environment. What distinguishes us is our ability to listen, interpret and develop our clients visions to genuine settings with a strong foundation in place.

Come create with us!
